Street 2006

The street is more than just a road, more than just a strip of blacktop that gets you from A to B, it's where you feel most alive, it's where you feel sensations that you'd never want to live without. At Yamaha we understand that. To us motorcycles aren't merely about metal, they're about emotion and excitement.

No one knows better than Yamaha about making streetbikes that stir the soul. And no one knows better than Yamaha about making custom gear for your streetbike. Developed by Yamaha design staff who work hand in hand with our streetbike development staff, our range of trick bolt-on parts and apparel is all you need to turn your bike into your own personal piece of perfection.

A new way to get your thrills on the street

Ignition on, press play... Tricker isn't just transport, it's your own urban entertainment system. Tricker is a whole new style of city bike - created by Yamaha to bring X-games thrills to the street. Easy to ride, easy to play with and easy to customise, Tricker unlocks the fun of the city. Because the city isn't just home, it's your playground.

Tricker custom gear - make it personal

Special custom parts and accessories can do things for your Tricker - personalise its style, make it even lighter and sweeter to ride.

Composite Protectors

Composite Protectors offer a higher standard of protection on account of their patented mesh structure. Their excellent shock-absorption capacity ensures compliance with CE safety prerequisites. The ergonomic design enhances the garment's fit, while the perforated external structure helps breathing. They are fitted on the shoulders, elbows, knees and back.

D-Stone®

D-Stone's enormous strength and excellent elasticity make it a viable alternative to leather. This material is used in the areas of the body that require greater freedom of movement and ensures a comprehensive blend of protection and comfort.

❶ **YM600 Additional Alarm for Motorcycle with Immobilizer**
(see fitment chart for application)

Note: For Yamaha's equipped with an OE installed immobiliser system

- Specifications:**
- Patented 3 Dimensional movement sensor detects all changes in 360°
 - Protection against sabotaging the alarm unit
 - Automatic arming and disarming by ignition key
 - Service mode operated by ignition key
 - Complete Genuine Yamaha Alarm System set
 - All settings are electronically commanded
 - Incorporated self testing procedure
 - The YM600 interfaces with OE immobiliser system via a coded signal
 - OE wiring connectors guarantees easy and secure installation
